

SHIPMENT LABELLING AND MARKING

Labelling

- Prepare the shipment in the HRX web environment and print out the address label.
- Place the address label on the top of the parcel. When labelling a pallet, place the label on the side of the pallet depending on its height.
- Avoid creasing the label or placing it on corners, edges or joints.
- Add the address label to each packaging unit.
- When using reusable packaging, remove all old labels and special markings.
- Make sure that the address label stays on the packaging throughout transport.

Special marking

- Shipments requiring special treatment must be marked accordingly.
- Paste the special marking next to the address label and add it to several sides of the shipment, if necessary, so that the information remains visible.
- Adding a special marking does not exempt you from proper packaging.

Handle with care

This side up

Keep dry

Temperature controlled

Do not step

Do not stack

Avoid sunlight

Do not drop

Do not roll
